

POWDER TECHNIC

# ANTI-DUST™ SCALE HOPPERS

*We supply scale hoppers for the precise weighing and dosing of powdered materials.*

## ANTI-DUST™ HOOD FOR THE DUST-FREE DOSING OF BAKERY POWDERS

A standard feature on all our new scale hoppers is cylinder-driven dust-removal hood, which is lowered onto a dough hopper when discharging the scale, thus effectively preventing the spread of powder dust into the environment. The Anti-Dust™ Powder scale meets the stringent dust exposure requirements set by the foodstuffs industry

## OPTIMAL GEOMETRY AND FLUIDIZATION EQUIPMENT AND ENSURE THE COMPLETE DISCHARGE OF THE SCALE

The scale discharge is ensured by the optimal geometry of the scale cone and the Fluidiser auxiliary discharger, which allows for a complete discharge every time.

## MEETS ATEX REQUIREMENTS

Powder Technic's scale hoppers are suitable for use with explosive powders. We fit our scales with the appropriate certified safety components and conduct the required ATEX ignition risk assessments.
